PUBLIC ADVERTISEMENTS

OFFICE OF THE PRINCIPAL INFORMATION OFFICER TO THE GOVERNMENT OF MYSORE, OLD PUBLIC OFFICES, BANGALORE.

Press Note.

Dated 18th July 1950.

Articles in sections of the Press have been published asking that sufficient care should be taken to replace deteriorated wooden or steel poles that have been used in the electrical distribution systems of towns and villages in the State. In order to allay the fears of the public in this behalf, the Electrical Department wishes to make it known that every precaution is being taken to examine all the old poles that have been erected years ago and such of those that require replacement are being periodically replaced. At present, more than 1,00,000 poles are in service in the distribution system throughout the State. The public are assured that every thing possible is being done to see that no dangerously deteriorated pole is allowed to exist in the distribution systems as far as practicable.

The following Press Note issued by the Government of India on the subject of Streptomycin treatment in tuberculosis is republished for general information :—

"With the advent of streptomycin in the field of treatment of tuberculosis, the attention of the public has been focussed on this drug to a degree out of all proportion to its value in the treatment of the disease. Although the treatment of certain specific types of tuberculosis by this drug has been proved to be efficacious, yet in so far as the treatment of pulmonary tuberculosis with this drug is concerned, the types of disease in which the drug can be of use have not been clearly defined. Indiscriminate and careless use of the drug in cases of tuberculosis renders the patient unamenable to treatment by the drug if it becomes necessary to repeat the treatment at a later date. Besides, ill-effects have known to have occurred to patients who are sensitive to the drug. In view of these facts, the drug has still to be considered dangerous and its use should, therefore, be restricted only to certain types of tuberculosis and by those who have experience in selecting suitable patients for this treatment."

Press Note.

Dated 21st July 1950.

As measure of relief to the atchkatdars who have suffered on account of the failure of wet crops under the Srirampura Hirekere tank in Hosadurga Taluk owing to non-receipt of adequate supply of water to the tank consequent on the scanty rains, seasonal remission of half wet assessment amounting to Rs. 549-15-0 is sanctioned in respect of an extent of 221 acres 28 guntas under the tank for the year 1949-50.

(P. N. No 96—dated 21-7-1950—3,601-700).

Press Note.

Dated 21st July 1950.

The Government of India have issued amendments to the Motor Spirit Rationing Order, whereby the *basic quota* of petrol to cars is enhanced by 50 per cent.

As the Mysore Motor Spirit Rationing Order is an adaptation of the Order issued by the Central Government, corresponding amendments to the same have therefore to be made in the Mysore Motor Spirit Rationing Order. A Notification amending the Order is accordingly issued in this behalf.

(P.N. No. 97—dated 21-7-1950—3,701—800).

Press Note.

Dated 22nd July 1950.

In view of the topical interest that has arisen in cholera-like diseases prevalent in many places in India, it is worthwhile to present the experience of the Bangalore Public Health Institute in the epidemic of cholera recently prevalent in some towns and villages of the Mysore State. In Kankanhalli, cholera attacks were reported in November 1949, and in view of the vigilant preventive measures undertaken by the Health Department, it was quickly brought under control. However, a second epidemic of cholera, started in February and March 1949 when quite a few attacks and some deaths occurred in the same town. Bacteriologically the examination of the excreta of the persons suffering from the disease were negative, at first but persistent bacteriological examination by serial passag, ing through selective media, enabled the Institute to isolate after the fourth or the fifth attempt, a strain of cholera identified as the Inaba strain of the vibrio. A similar experience occurred in Koratagere, a town in Tumkur District. There was an epidemic of cholera-bacteriologically positive, in April and May. After a lull of about over a month, a second epidemic started with about twenty attacks and four deaths. Here also persistent bacteriological experimentation was necessary to isolate the vibrio cholera from vomites or excreta of persons attacked by the disease. A sample of water taken from a standing shallow basin in the river bed, showed contamination with cholera vibrio (a chance of what one might call, one in a million)

inoculation. But unless other precautions against the attack of the disease by avoidance of all infected raw food articles, eradication of the fly population by DDT., complete sterilisation of water, heating raw milk before use, etc., are observed, one can be attacked by cholera even though protected by preventive inoculation.

Press Note.

Fears had been expressed in certain quarters that the Krishnarajasagara Reservoir may not fill in, though the season is normal. Providence has been kind and the Reservoir has picked up level rapidly and it stands today at 6 A.M. at 112 feet. The following figures are the Reservoir levels in the previous years on 26th July :—

1948	...	110.14
1949	...	102·28
1950	...	112·00

As already notified, water supply has been allowed in the two low-level channels from 10th July continuously and in the Visvesvaraya Canal from 15th July for a week.

In view of the storage in the Reservoir, it is decided to give continuous supply of water in the Visvesvaraya Canal from 5th August onwards.

The raiyats may start their agricultural operations with confidence of continuous supply of water. The raiyats are requested to co-operate with the Public Works Department authorities in the regulation of water supply and in the economic use thereof.

It is also notified that illumination at Brindavan Gardens will be resumed as usual on Saturdays and Sundays.

(P. N. No. 99—D. 26-7-1950—9,901-10,100).

Press Note.

Ever since the introduction of control over fuel, the monopoly of supplying fuel to Bangalore City, was being entrusted to contractors after calling for tenders. The public are hereby informed that this monopoly has been done away with effect from 1st January 1950. The present contractors, *viz*, the Mysore National Contractors and Suppliers' Company, Bangalore, are only required to supply a certain quantity of fuel monthly for Civil Consumption in Bangalore. Private persons can therefore import into and trade in fuel without any restriction as to price, within the limits of Bangalore Corporation or Bangalore North and South Taluks, or open fuel shops after obtaining Municipal licenses.

2. The following restrictions, however, will continue to be in force :—

(i) Fuel cannot be transported by rail to Bangalore or for export outside the District, except when it is consigned to the Special Officer or to the Mysore National Contractors and Suppliers Company, or when it is covered by a Permit issued by the Special Officer.

(ii) The transport of casuarina fuel in the District of Bangalore and in Malur Taluk, Kolar District, is not allowed except under a Permit issued by the Special Officer, Fuel Supplies, Bangalore.

(iii) Transport of fuel from hiduvali lands and forest areas should as usual be covered by Mafi-Pass obtained from the concerned Amildars and licenses from Forest Officers, respectively. But in cases of such supplies to the Special Officer, Fuel Supplies, Bangalore or to the Mysore National Contractors and Suppliers' Company, Bangalore, a Permit obtained from the Special Officer, Fuel Supplies, shall be deemed to be sufficient for transporting fuel into the limits of Bangalore Corporation.

(P.N. No. 100—27-7-1950—10,101—200).

Press Note.

In view of the improved storage in the Krishnarajasagara Reservoir and the improved inflow which is in the order of 98,000 cusecs, water has been allowed in the Visvesvaraya Canal for irrigation from to-day instead of from the 5th of August 1950.

All arrangements have been made for proper regulation of water supply. The raiyats in the Visvesvaraya Canal area are requested to expedite their agricultural operations and complete the transplanting of paddy in the programmed area before the 15th of September 1950. The planting of sugarcane also may be started immediately.

The water level in the Reservoir to-day at 12 NOON stands at 122'3 feet.

Press Note.

Health of Live-stock during June 1950.

In their order of severity, outbreaks of Rinderpet, Black-quarter, Anthrax, Hæmorrhagic-Septicæmia, Foot and Mouth, Contagious goat pluro-pneumonia, Sheep-pox, Rabies and Ranikhet were encountered in the State during June 1950. Altogether 315 villages were reported to have been affected by one or the other of the above contagious and infectious diseases as against 296 villages during the previous month. The number of outbreaks was highest in Bangalore, Chitaldrug and Kolar Districts, while Shimoga, Hassan and Chikmagalur Districts were least affected. These diseases accounted for 1,284 attacks, of which 941 succumbed as against 1,029 attacks and 609 deaths during the previous month. The Departmental staff undertook 42,028 preventive inoculations and vaccinations against all the above diseases except Foot and Mouth disease. In the absence of a reliable method of vaccinatory intervention, other prophylactic measures were adopted against Foot and Mouth disease.

Rinderpest took a somewhat serious turn during the month and as many as 7 outbreaks were registered in Davangere, Haribar, Hosanagar and Shikarpur Taluks accounting for 148 attacks and 77 deaths. Prompt measures of control were undertaken by the Department to check its spread and 15,049 cattle were protected against the disease, both in the infected villages and in their immediate neighbourhood extending over a radius of about 3 miles. The disease appeared to be well under control at the end of the month under report.

Diseases caused by internal parasites were reported from 191 villages resulting in 87 deaths, as against 134 villages accounting for 101 deaths during the previous month. The special staff attached to the Parasitic disease control units and the Sheep Breeders' Associations of the Department dosed 10,517 animals, as against 11,301 animals during the previous month.

The rest of the Live-stock remained free from diseases during the month, and fodder and water were generally available throughout the State.
